For over 30 years, WBB professionals have helped hundreds of clients successfully manage their most complex mission-critical business problems. By working closely with our clients, we're able to deliver sustainable, measurable results. WBB has become a trusted partner in the areas of Transformative Change, Enterprise Planning and Execution, and Mission Performance Optimization. Our focus is on providing the information our clients need to make an informed decision and take appropriate action.

The Deputy Secretary of Defense has signed the *Strategic Plan for United States Department of Defense Vertical Lift Aircraft*. WBB has been supporting the Office of the Secretary of Defense (OSD)-sponsored **Future Vertical Lift Initiative** since its inception in August of 2008. Employing a WBB-developed Capability Portfolio Management (CPM) process, the Future Vertical Lift (FVL) Initiative identified the *capability gaps* in vertical lift aviation (helicopters, tiltrotors), developed a *resourced implementation plan* to mitigate those gaps, and wrote a *Strategic Plan* to Define, Design, Develop and Deliver the Next Generation of Vertical Lift Aircraft to the Warfighter. The signing of the *Future Vertical Lift Strategic Plan* on 30 August 2012 marked the culmination of this 4 year effort to improve the state of Vertical Lift Aircraft for all of the Department of Defense, to include the US Coast Guard. The Land Warfare and Munitions (LW&M) directorate of OSD(AT&L) sponsored and provided oversight for the entire process. WBB is proud of their longstanding role in the Future Vertical Lift Initiative and the impact it will have on the future of National Security, and salutes its employees who led this effort: Frank Boynton, Mark Gibson and Jim Moentmann. More information can be found via the **WBB Vertical Lift Consultancy** or the OSD LW&M office at [contact futureverticallift@osd.mil](mailto:futureverticallift@osd.mil).
